

Hello Everyone:

Shady Lady's plans have had to be changed!

There are a number of reasons for this change of plans.

1) The big one which concerned us was the January 1st, 2018 quadrupling price of 100LL avgas above the forecast stated in my 240 Flight Plan segments for the 117 pairs of airports, which were completed by mid-December 2017 [formulating those Flight plans took me more than 800 hrs]. refer this link : Hurricane Harvey threatens production along pipelines and refineries... <<https://globalresilience.northeastern.edu>> › News Sep 6, 2017 - The impact of Hurricane Harvey forced 18 refineries in Texas to partially or completely shut down. ... The Colonial Pipeline, which runs 5,500 miles from Houston to Linden New Jersey, is the primary supplier of gasoline, home heating oil, aviation fuel, and refined petroleum products to the East Coast.

The journey begins at CYYJ-Victoria across southern Canada to CYR-Goose Bay, then over the North Atlantic Ocean to the U.K., France, Malta , SW and western Russia, Baltic states, RAF airfields , then via Murmansk and Norway to Canada's Arctic , the Yukon, Alberta, thence a circuitous route home to CYYJ.

2) Another reason : if we didn't have a firm start date , then Shady Lady's owner needed time to pre-plan this summer's airshow flights.

The following statement is from our Producer :

"The production is moving forward on all levels with the prime purpose of raising the capital to fund our ambitious enterprise. At this time it has been decided to prioritize the British Columbia and California legs of the journey to begin this Autumn of 2018 as a stepping stone and proving ground for the main world trip next Summer of 2019. This maximizes the potential for success using the achievements of all the hard work that has so far been put into play. To reflect this our website is being totally redesigned by Rick Fawcett Design in London and further announcements will follow."

To say that we are very disappointed that Shady Lady is unable to take off on May 1st, 2018 is a major understatement.

Fly Safely,

Best regards,

Hugh MacCallum
